SCANNING

Scanning fragments of books and magazines

INSTRUCTIONS FOR ORDERING THE LIBRARY SCANNING SERVICE DURING A PANDEMIC PERIOD

Due to the limited access to library resources, especially for students and learners from outside Bydgoszcz, we have introduced the possibility of free electronic ordering of digital copies of fragments of books and magazines.

1. The library enables researchers, doctoral students, students and postgraduate students of WSG who write their diploma theses (bachelor's, engineering, master's, postgraduate) free of charge ordering a digital copy of excerpts from books and magazines.
2. Librarians make digital copies only from materials that are in the resources of the WSG Main Library.
3. Orders for making copies from library resources are sent to the following address: Biblioteka@byd.pl. Should be given:
 - in the case of a book fragment: reference number, author, title and pages, in the case of multi-volume volume number,
 - in the case of journal articles: author, article title, journal title, year, number and pages.
4. The maximum number of pages for making digital copies may not exceed 20 pages.
5. Orders will be processed in the order of their receipt and sent only by e-mail.

EXAMPLE OF THE ORDER:

Fragment of the book: Kuziak M., Rzepczyński S., How to write (reference number: 32550), pp. 283-295.
Article from the journal: Stankiewicz J., The influence of the geometry of the coil system on the efficiency of wireless energy transmission, Przegląd Elektrotechniczny, 2020, No. 6, pp. 7-10.

Required data of the Ordering Party:
1. First name and surname of the reader

REMOTE ACCESS

Virtual Library of Science - remote access

Remote access to Virtual Library of Science (<https://wbn.icm.edu.pl>) resources

EBSCO

Employees and students can enter the base using any external connection. In order to do so, the user must have an account created by the WSG Library in the administration panel, by sending such a request by e-mail: biblioteka@byd.pl. Then the user enters the site: <https://search.ebscohost.com/> and log in using the data sent by WSG Library employees.

About Ebsco

Ebsco covers a wide range of fields: scientific, technical, humanities, social, economic, business, medical and biomedical sciences. 15 databases, including 7 full-text databases containing scientific journals from various publishers, books, newspapers and other publications.

ELSEVIER (ScienceDirect and Scopus)

Remote access is possible for WSG employees and students who have e-mail accounts in the byd.pl (employee) and student.wsg.pl (student) domain!
The user must create an individual account via the "Register" option on the [sciencedirect.com](https://www.sciencedirect.com) or [scopus.com](https://www.scopus.com) server (the account is common for all Elsevier products) and then activate remote access to the resources at the bottom of the website. The above operations can be performed outside the academic network, but activation requires the use of an email address belonging to the address domain of the institution, i.e. email addresses: name.surname@byd.pl (employee) or name.surname@student.wsg.pl (student).

About ScienceDirect

ScienceDirect is a leading full text scientific database offering articles and book chapters. Subjects include technical, mathematical and natural sciences, medicine, chemistry, physics, economics and many others. It

HOW TO SEARCH ON GOOGLE

The screenshot shows a web browser window with the URL biblioteka.wsg.byd.pl/id.42/jak-szukac-w-google. The page header includes the logo for 'WYŻSZA SZKOŁA GOSPODARKI WSG' and a navigation menu with items: home, Practical information, Online Resources, Reporting scientific achievements, About us, CDE, and contact. A language selector shows 'polski' and 'angielski'. The main content area features a banner image of a library with the text 'WSG library' and a breadcrumb trail: HOME / PRACTICAL INFORMATION / HOW TO SEARCH ON GOOGLE. Below the banner, the title 'How to search on google' is followed by a paragraph: 'Google is a full-text search engine, which means that web pages are searched by title and content. In addition, Google offers several additional functions: - calculator function - just enter math operations in the search field to get the result.' To the left of this text is a small image of a Google search page with a calculator widget. To the right is a vertical list of search-related topics: Search strategy, Personalization of results, Operators and special characters, Search tools, and Specialized Google search engines.

FOOTNOTES AND BIBLIOGRAPHY

The screenshot shows a web browser window with the URL biblioteka.wsg.byd.pl/id.105/przypisy-bibliograficzne-i-bibliografia-zalacznikowa. The page header is identical to the previous screenshot. The main content area features a banner image of a library with the text 'WSG library' and a breadcrumb trail: HOME / PRACTICAL INFORMATION / BIBLIOGRAPHIC NOTES AND ATTACHMENT BIBLIOGRAPHY. Below the banner, the title 'Bibliographic notes and attachment bibliography' is followed by a list of links: Notes on the rules for drawing up bibliographic footnotes according to PN-ISO 690: 2012, Types of footnotes, Abbreviations in bibliographic footnotes, Models of bibliographic footnotes of various types of documents, Rules for drawing up footnotes and attachment bibliography in the field of technical sciences, medical sciences, health sciences and physical culture in force at WSG, and Rules for drawing up footnotes and attachment bibliography in the field of humanities and social sciences in force at WSG. To the right of the list is a blue button labeled 'E-books' and a grey button labeled 'WSG Library Catalog'. Below these buttons is a 'NEWS' section with two entries: 'Christmas break / Christmas break December 9, 2021' and 'Due to the move, the Library in Inowrocław will be closed'.

Useful information available in pdf format at each link.

Central directories

Worldcat - Worldwide Library Resource Directory. The catalog is created and maintained by the libraries whose collections are included in it. Currently, WorldCat consists of three components: a bibliographic catalog, a knowledge base, and a library information register. In addition to books and printed magazines, the catalog of physical materials includes DVDs, historical photos, video games, sheet music, newspapers, websites, and more. Number of languages in Worldcat: 484 (as of January 2019), number of bibliographic records 449,588,069 (as of April 2019) (data from the website <https://www.oclc.org/en/worldcat/inside-worldcat.html>).

NUKAT - the central catalog of the collections of Polish scientific libraries.

KaRo - Distributed Catalog of Polish Libraries, which allows access to information about the resources of many Polish libraries and facilitates searching for interesting books, magazines or bibliographic descriptions. KaRo should be treated as a supplementary tool for the Polish central NUKAT catalog.

FIDKAR - a multi-search engine enabling a combined search of catalogs and databases of FIDES Federation church libraries, databases of the National Library and catalogs of other libraries.

POLISH DATABASES

Niezabezpieczona | biblioteka.wsg.byd.pl/id.118/bazy-danych-polskie

Polish databases

SELECTED POLISH PUBLISHING AND BIBLIOGRAPHIC RESOURCES

- AGRO** - bibliographic database includes bibliographic descriptions of articles from 1010 Polish journals, published in Polish and English. The thematic scope of the base is natural and agricultural sciences and related sciences, including: veterinary medicine, food economy, gastronomy, environmental protection, toxicology, bromatology, commodity science, agritourism, physical culture. Chronological range of the database since 1992.
- ARIANTA** - informs about the content of scientific and trade Polish electronic journals.
- BazEkon** - current, annotated with a bibliography of economic and related issues. It informs about the content of the leading nationwide scientific and economic periodicals and scientific publishing series of economic universities, economic and management faculties of universities, as well as scientific institutions, including non-governmental ones.
- BazHum** - bibliographic database of Polish scientific humanities and social journals.
- BazTech** - a bibliographic and abstract database that has been registering, since 1998, articles from 698 Polish journals in the field of technical, exact and environmental sciences. BazTech is developing towards a full-text citation database. Attachment bibliographies are added to article descriptions (from 2005), and based on agreements with publishers - full texts of publications.

FOREIGN DATABASES

Foreign databases

- **Directory of Open Access Books (DOAB)** - a service that registers full-text scientific books available under the Open Access rules. The website, managed by the OAPEN Foundation, has a search engine that allows users to search the collection by title, subject category and publisher name. Each record contains basic information about the item as well as a link to the full text. The website is constantly updated with new titles and covers all scientific disciplines, including: art, biology, chemistry, geography and economics.

Access to the bases in the WSG network:

VIRTUAL SCIENCE LIBRARY

- **Ebsco** - basic package of 15 databases, including 7 full-text databases containing scientific journals from various publishers, books, newspapers and other publications: Academic Search Ultimate, Business Source Ultimate and Regional Business News, Health Source: Nursing / Academic Edition, Health Source: Consumer Edition, Master File Premier, Newspaper Source and 7 bibliographic (abstract) databases: Agricola, ERIC, GreenFILE, Library Information Science & Technology Abstracts (LIST), MEDLINE, European Views of the Americas, Teacher Reference Center and a database containing drug descriptions: AHFS Consumer Medication Information. The databases are available on the EBSCOhost platform within the IP address network and remotely after receiving the login and password from the librarian.

ONLINE LIBRARIES

Online libraries

Europeana - digital library, virtual museum and archive to bring Europe's cultural and scientific heritage online. Provides access to over 50 million digital items - books, music, works of art, and more.

Polona - Polish digital library, which provides access to digitized books, magazines, graphics, maps, musical items, leaflets and manuscripts from the collections of the National Library and cooperating institutions.

FBC Federation of Digital Libraries - collections of 138 Polish cultural institutions on-line with over 6.3 million objects (as of May 28, 19).

Kuyavian-Pomeranian Digital Library - is part of the Federation of Digital Libraries. Its resources include materials related to the Kuyavian-Pomeranian Voivodeship, as well as publications of schools and universities in the region.

Military Digital Library - Zbrojownia - WBC Zbrojownia integrates and promotes digital resources of collections scattered around the country, constituting the cultural heritage related to the Polish Army, with its history and the present, and supports didactic and educational activities. It also publishes new content in the field of security and defense sciences.

Repositories

Online repositories are tools for collecting, storing, indexing, and sharing electronic versions of scientific papers.

We divide the repositories into:

- institutional - they accumulate the scientific achievements of a given institution,
- domain - collecting research data from a specific area of knowledge.

Polish repositories

- **CeON aggregator** - a common access point to the resources of Polish open repositories. It allows you to search them.
- **AMUR** (Adam Mickiewicz University in Poznań) - institutional repository.
- **Knowledge Base** - Repository of the Warsaw University of Technology - institutional repository.
- **CeON** (Open Science Center Repository) - open to the public.
- **Cyrena** (Repository of the Lodz University of Technology) - institutional repository.
- **ECNIS** (Institute of Occupational Medicine in Łódź) - domain repository.
- **ENY** (Wrocław University of Technology) - institutional repository.
- **eRIKA** (Institutional Repository of the Andrzej Frycz Modrzewski Krakow Academy) - institutional repository.
- **IBB PAS Repository** (Polish Academy of Sciences - Institute of Biochemistry and Biophysics) - institutional repository.
- **Lectorium** (Open Repository of Historical Sciences) - domain repository.
- **oPUB** (Repository of the University of Lower Silesia) - institutional repository.
- **RCIN** (Digital Repository of Scientific Institutes of the Polish Academy of Sciences) - institutional repository.
- **REACT** (Research, Education and Methodology Center) - institutional repository.

A 21st Century Technical Infrastructure for Digital Preservation

Nathan Tallman

ABSTRACT

Digital preservation systems and practices are rooted in research and development efforts from the late 1990s and early 2000s when the cultural heritage sector started to tackle these challenges in isolation. Since then, the commercial sector has sought to solve similar challenges, using different technical strategies such as software defined storage and function-as-a-service. While commercial sector solutions are not necessarily created with long-term preservation in mind, they are well aligned with the digital preservation use case. The cultural heritage sector can benefit from adapting these modern approaches to increase sustainability and leverage technological advancements widely in use across Fortune 500 companies.

INTRODUCTION

Most digital preservation systems and practices are rooted in research and development efforts from the late 1990s and early 2000s when the cultural heritage sector started to tackle these challenges in isolation. Since then, the commercial sector has sought to solve similar challenges, using different technical strategies. While commercial sector solutions are not necessarily created with long-term preservation in mind, they are well aligned with the digital preservation use case because of similar features. The cultural heritage sector can benefit from adapting these modern approaches to increase sustainability and leverage technological advancements widely in use across Fortune 500 companies.

In order to understand the benefits, this article will examine the principles of sustainability and how they apply to digital preservation. Typical preservation activities that use technology will be described, followed by how these activities occur in a 20th-century technical infrastructure model. After a discussion on advancements in the IT industry since the conceptualization of the 20th-century model, a theoretical 21st-century model is presented that attempts to show how the cultural heritage sector can employ industry advancements and the beneficial impact on sustainability.
